

Lower Price Membership

(and preview of the Ultimate Solution)

It is now August 2017 and I am disappointed in myself. I thought that by this time I would have a system of making money consistently playing the Pick 3 game. Yes; I do have a Straight Number System (based on the sum 10 to sum 17 numbers) that gave me two straight hits on two consecutive weeks recently: <https://pick3master333.com/my-straight-hits/> – but that is not good enough because I have no idea when the next hit is coming. The system I have in mind would tell me exactly when the next hit is coming. The ideal or perfect Pick 3 system would give you hits within a short time window; the shorter the window, the less money you have to spend. However, this means having to play more numbers – but that is fine if you are coming out ahead financially. And actually, I do have such a system in mind (which I will explain later in this report) but I am still working on it. In the meantime, I have a special announcement.

I do not feel comfortable charging players \$60 per month for Gold membership because I have not delivered what I said I would deliver years ago: I have not come up with the ideal or perfect Pick 3 system.

Therefore, I will reduce the price of Gold membership.

For those of you who are new, I explain my membership levels here: <https://pick3master333.com/60-special/> - From this point forward you can be a Gold member for **3 MONTHS for the price of one.** That's 3 months of Gold membership for \$60.

If you are currently a VIP member, if you renew in the future you will be renewing for Gold membership. This will give you access to the Gold programs:

GOLD SPECIAL

- > NEW YORK 33%
- > GEORGIA 35%

GOLD: 70 NUMBER PROGRAMS

- > OHIO 26%
- > MASS 26%
- > FLORIDA 25%
- > TEXAS 29%
- > NEW YORK 22%
- > NORTH CAROLINA 25%
- > VIRGINIA 23%

GOLD: SHORT LIST

- > BOX-TO-STRAIGHT-4

PLUS I will email you the reports that explain my Straight Number System; the same system I used to hit **271** STRAIGHT in New York on August 19 and **079** on August 11 this month.

PLUS you will get the **Leader Report** every Sunday morning for the next 3 months (these report have predictions for the next 7 days).

All you have to do is email me with **GOLD FOR 3 MONTHS** on the subject line of your email when your membership expires. (If you renew now, I will add 3 months of Gold membership to your account). That's for current members, if you are brand new, I will create an account for you giving you access to ALL my Pick 3 and Win 4 programs (only Gold members have access to ALL my programs).

My email is aanewyork4000@gmail.com

Basic membership is still \$20 a month. You will have to pay for 3 months at a time (\$60) to qualify for the Gold membership special I am explaining here.

In addition to getting the Leader Report, once you become a Gold member you will also get two reports explaining how **5dimes.com** works (and the traps to avoid).

NEW Members

If you are NEW or if you joined my email list recently, here is what I recommend you do: **first take the 10 days of FREE training.**

<https://pick3master333.com/free/>

Then request my free reports.

Simply email me with **SEND ALL FREE REPORTS** on the subject line of your email and I will email them to you. The free reports (and a brief description of what is in the report) are listed below.

How to Record Your Numbers

I suggest you read this report first. Most of my programs require that you enter many numbers in the top input box, which assumes that you have these numbers written down somewhere. This report explains how to go about recording the numbers in your state on a day to day basis.

Book-80

I explain the Leader System in pages 32 to 50 of this report. However, I explain MANY other interesting strategies in this report.

The Leader Master List

Here I explain an improvement I made to the Leader System.

The Follower System – (Parts 1 and 2)

This is not my system. I found this system on Lotterypost.com. Here I provide a unique list of followers for every number in the Pick 3 game.

A Straight Number System

Here I explain an interesting Pick 3 straight number system.

Basic Box

This report explains the Basic Box program in detail.

I also explain in this report a Pen and Paper version of the Basic Box system that does not require the use of programs.

How to Find Good Doubles to Play

If you want to find the best doubles to play, read this report.

How to Reduce Any List

Here I explain a unique way to reduce any list of numbers.

Pair Frequency Finder 100

Here I explain a pair system based on the last 100 numbers that hit you state.

The Leader Hit Reports

The Leader System is really good and this is clearly seen by studying the Hit Report which shows the numbers in the Leader Report that hit in the next 7 days. All previous Hit Reports are available for free. Just email me with **SEND HIT REPORTS** on the subject line of your email and I will email them to you right away.

Having free access to my programs for 10 days AND reading the free reports listed above will teach you the basics strategies I use and how my basic programs work.

After the 10 days you can email me with **GOLD FOR 3 MONTHS** on the subject line of your email and I will send you a Paypal invoice for \$60. After I get payment, I will change your membership to Gold. You will have 3 months of access. I will also send you the two reports that explain how 5dimes.com works and starting the next Sunday morning you will start receiving the **Leader Report** which has predictions for the next 7 days (Sunday to Saturday) for several states.

NOTE: I explain the Leader System in pages 32 to 50 in **Book-80** and in the **Leader Masterlist** report.

Keep in mind that if I come up with THE solution to the Pick 3 game in the near (or far) future, the price of Gold membership will go back to normal: \$60 per month. For now, it will be \$60 for 3 months. Feel free to email me if you have any questions.

I will end with a bit of Pick 3 (and Pick 4) wisdom:

Always play on paper first.

This holds especially true with new unproven systems.

Write down what number or numbers you think will hit based on your system and then wait to see what happens.

Here is what is going to happen; **you will NOT hit.**

That's right: the "hot" system that promises to give you super-hot numbers will NOT deliver. The numbers from this hot system (which showed **many hits** during your back testing) will not hit. However, if you follow my advice that's OK because you did NOT put any money on the numbers: you played on paper, so you did NOT lose any money.

And not losing money is as good as winning money.

The second thing that will happen if you play on paper first is that you will LEARN something. It may be a small thing or a big thing; but you will definitely learn something. You can then take what you learn and IMPROVE your system, thereby increasing your chances of hitting the NEXT time you play.

And that, my friend, is **how you get better at playing both Pick 3 and Win 4:** you make a prediction, you see what actually hits, you learn from it, and then you improve your system. You repeat this cycle over and over again and you will keep coming up with increasingly better and better systems. And once you do have a system that actually works and hits consistently, **THEN and only then can you start putting money on the numbers.** And you can do this now because your system has a track record of hitting; so you are more likely to WIN than to lose.

If you have been on my email list for a while, you should be familiar with these ideas. I actually put up a post about this a while back:
<http://alturl.com/gnntw>

Now I will share with you some NEW Pick 3 and Win 4 wisdom. And actually, what I will be doing next is giving you a preview of what may very well be the ULTIMATE and BEST solution to the Pick 3 riddle.

Preview of the Ultimate Solution

The fact that 5dimes.com pays out **\$900** on a \$1 straight hit has not been adequately exploited.

Stated another way (they pay \$225 on a 0.25 cent straight bet):

The fact that 5dimes.com pays out **\$225** on a 0.25 cent straight hit has not been adequately exploited.

Below are 3 definitions of the word **exploit** plus a few synonyms:

1-Make full use of and derive benefit from (a resource).

2-Use (a situation or person) in an unfair or selfish way.

3-Benefit unfairly from the work of (someone), typically by overworking or underpaying them.

Synonyms: take advantage of, abuse, impose on, treat unfairly, misuse, ill-treat.

What I am saying here is that the extra **\$400** that 5dimes.com pays out on a \$1 straight hit (normally you would win \$500 on a \$1 bet) SHOULD be used **in an unfair or selfish way.**

What happens when you play the normal way at the store by you and you win is that you win HALF of what the true chance of winning is: \$500 (there is a 1 in 1000 chance of hitting).

With 5dimes, you get a little closer to that \$1000; you win \$900.

If I was a Mathematician (I am not-I am a strategist) I would find the right formula or betting strategy to fully take advantage of this generous payout. I don't know this magic formula – but what I do know is that exploiting this payout will require playing **hundreds** of straight numbers; so it will require a large budget.

However, I have no problem with that if I am ahead financially. In other words, if I keep winning more money than I am putting into the system, I am fine.

Now let me share with you an idea I have been playing around with:

Playing Pick 3 with 60% coverage.

This means playing 600 straight numbers.

The numbers I have in mind now are the sum 10 to sum 17 numbers: BOTH singles and doubles:

Singles and Doubles

114 Numbers used

019 028 029 037 038 039 046 047 048 049 055 056 057 058 059

 824 825 826 827 830 831 832 833 834 835 836 840 841 842 843 844 845 850 851 852 853 854
 860 861 862 863 870 871 872 880 881 890 901 902 903 904 905 906 907 908 910 911 912 913
 914 915 916 917 920 921 922 923 924 925 926 930 931 932 933 934 935 940 941 942 943 944
 950 951 952 953 960 961 962 970 971 980 (560)

I need 40 more numbers to have 60% coverage.
I will most likely get these from the sum 9 or sum 18 numbers.

This “super list” of 600 straight numbers will have both singles and doubles so if a sum 10 to sum 17 number (or some sum 9 or sum 18) hits – there will be a HIT. (This will ONLY work at 5dimes.com because if you play these numbers the regular way you will only win \$500.)

If you were to do this now (play 600 numbers on paper) you will notice that you are not necessarily coming out ahead financially – even with the generous \$900 payout that 5dimes.com offers.

To show a profit, you will have to do something else.

You will have to WAIT for 2 or 3 MISSES.

This means that you will have to wait for 2 or 3 back to back sum 0 to 9 hits - or 2 or 3 back to back sum 18 to 27 hits (or a combination of the two: for example: 012 (sum 3), 501 (sum 6), 759 (sum 21).

See this chart:

<https://sites.google.com/site/lotts4u/home-1/pick-3-sum-charts>

For example, the numbers 233, 123, and 333 hit New York on August 8 and 9 of this year (2017). These are low sum numbers (sum 0 to 9).

333 = Sum 9

123 = Sum 6

233 = Sum 8

That’s the trigger to use my 600 number system.

I have noticed that hitting the sum 10 to sum 17 numbers afterwards is as EASY as shooting fish in a barrel.

For example, 6 out of the 7 numbers that hit afterwards in New York were sum 10 to sum 17 numbers; they are on the list of 600 straight numbers.

650 = Sum 11 **WIN**

534 = Sum 12 **WIN**

744 = Sum 15 **WIN**

190 = Sum 10 **WIN**

079 = Sum 16 **WIN**

667 = Sum 19 (The only loss)

285 = Sum 15 **WIN**

THIS approach to the Pick 3 game may be the ONLY way to win consistently. And it will require (1) a large budget and (2) playing at 5dimes.

However, you would not start playing the numbers for \$1 – you would start playing the numbers for **0.25** cents, which means that playing all 600 numbers straight would cost \$150 per drawing. Each hit would be a **\$225** win, making the profit **\$75** (\$225-\$150). Later the numbers can be played for 0.50 cents, and then for \$1. The profit will be **\$300** at the \$1 per number level (\$900 won - \$600 invested). Assuming one has the budget, they can later be played for \$2 per number, \$3, \$4, \$5, etc...thereby increasing the profitability of each win.

One more little detail; **this is a situation where a Martingale betting strategy (doubling your bet after a loss) would actually WORK.** For example, you wait for 2 or 3 misses (sum 0 to 9 or sum 18 to 27) and then you start your progression. If you start out at the 0.25 level it would look like this: \$150, \$300, \$600, etc.

You will NOT have to go too far because a sum 10 to sum 17 number will most likely hit on the next ONE or TWO drawings. Feel free to back test this in your state; look for 2 or 3 missis; notice that a sum 10 to sum 17 number hits right afterwards.

So there you have it; the final solution I come up with for the Pick 3 game will most likely be based on these ideas (I will address the Win 4 game later; I want to solve one problem at a time). Feel free to email me if you have any questions or comments; or maybe you have a better approach or maybe I missed something; love to hear your opinion.

And remember to email me with **GOLD FOR 3 MONTHS on the subject line of your email to take advantage of my special price for Gold membership.**

The Pick 3 Coach

August 24, 2017

PS: If you want to learn a practical (non-lottery) long term money making system (one that I am actually using myself right now), I suggest you read my **Wealth Building System** Kindle. Its only \$2.99 at Amazon: <https://www.amazon.com/dp/B071CLM66Y> - Email me the code at the end of the Kindle and I will email you the PDF version of it, which is easier to read and navigate.
