

The 15-Number Report

I just sent out a list of 15 numbers good for New York (Wed July 30, 2014). They are good for 4 drawings.

How did I get these 15 numbers?

Here is the system I used; feel free to use it in your state.

First I got the most due 80 singles using the **Rundown List** program. For this I entered the last 80 numbers that hit New York as of Wednesday July 30, 2014. This gave me 80 singles, which are highlighted in yellow below.

NOTE: I personally like to convert numbers to their box form on my tracking sheet, but you don't have to. It does not matter how you enter the numbers on the programs below (box or straight); the programs will give you the same result.

Then I used the last 10 numbers to hit New York on the **DTD** program. Those numbers are (in box form): 589 124 235 128 249 235 348 289 367 447.

This gave me 80 numbers, which are highlighted in yellow below.

NEW STRATEGY

I then used a completely new strategy: I put in the last 20 numbers that hit New York on the **Revelation 4** program.

Revelation 4

20 numbers used: 589 124 235 128 249 235 348 289 367 447 068 336 348

REV4:

I then used the digits on each position on the **Box Positional Control** program.

2nd Position Digits: 4-2-3-6

3rd Position Digits: 8-9-4-7

246 247 248 249 267 268 269 346 347 348 349 367 368 369 (48)

I then copied all the yellow numbers above onto **the Group Matching System** program. That's 208 numbers! The program gave me **15** 3-way numbers (numbers on all 3 lists) and a 2-way list (numbers on 2 of the lists), but I am only interested on the shorter 3-way list.

These 15 numbers are good for the next 4 drawings.
