

# A Straight Hit in Texas

## INTRODUCTION

I got the email below recently from somebody from Texas who used several of my programs to get a straight hit in Texas on August 6 (**347**). However, before reading it, I suggest you first read my last 3 reports, available for FREE on my blog at <http://pick3master333.com>.

Those 3 reports are (**read them in this order**):

[15-Number-Report-7-30-2014](#)

[My Crazy Idea-7-31-2014](#)

[JULY-31-Report-15N](#)

He used what he called the **Elimination List**, which are numbers that only hit **one** time in the last 100 drawings. He then cross referenced this list with 3 other lists: DTD, Rundown, and Box Positional List on the **Group Matching System** program.

I am sure you will have many questions after reading this report.

**Do NOT email me with specific questions about his system**; just use the **general idea** of finding good lists and then cross referencing them on the **Group Matching System** to get a few hot numbers.

**That's the basic idea behind this and the 3 reports I have on my blog**; cross referencing good lists on the **Group Matching System** to come up with a short playlist.

If you are not currently on my coaching program and want to test out my programs, you can take advantage of my **\$60 Special** which I describe here: <http://alturl.com/mbipb>

Or: <http://pick3programs.com/info.php?R=P3P&P=Info&S=TOP:Special>

**Anthony, I got a straight hit 347 in drawing 4-4 in Texas tonight. I played only 2 numbers: 290 and 347.**

I used these 4 lists:

1. **DTD Matching List (37 numbers)**
2. **Elimination List (Last 100 draws - 61 numbers after elimination)**
3. **Rundown List (80 numbers)**
4. **Box Positional Playlist (12 numbers put into Revelation 4) (48 numbers)**

347 was a 4-Way match from all 4 lists. It was a repeat from the 4-4 draw of Wednesday, July 4, 2014 (6 days before and 24 draws before -- at 4 draws before).

Refresh: **Elimination List** is the 1-Way match list that is left after you eliminate ALL numbers that have repeated in any number of matches greater than 1 in the last 100 periods.

Here is my workup. (It takes about 30 minutes).

Sure could use the 1-Way match feature in the Group Matching Program.

Thanks.
