

# **\$2,215 Profit in NY, NJ, and FL**

## **EMAIL I JUST GOT:**

I just did some testing of the **Basic Box** program starting on Nov 1 until now. I did a running total of New York, New Jersey and Florida. I used a dollar boxed wager for this test. This is following all the rules you sent including the days you wager nothing at all. NJ came in last place at a total profit of **\$335** (but that will increase by 45 if it hits tonight). FL was 2nd with a total of **\$930** dollars and finally NY was the leader at a total of **\$950** dollars. Playing all 3 states to date would give you a profit of **\$2,215** as of today and possibly \$45 more if NJ hits tonight and I think it will.

Just thought I would share that with you. This is how I determine if a system is worth it or not. The part that gets tricky is **if you have a day that misses then it hits the next day so you go back to playing and then you double those wagers and you miss that day too.** I haven't figured out the best way to overcome that. Let me know your advice on that....if you have got that far yet.

Thanks

## **MY RESPONSE:**

**At this point in time I suggest playing at the lowest possible level (0.25 and 0.50 cents) and DO NOT double up.**

Just keep it at the lowest level possible so if you lose, you don't lose that much.

This is an amazing system: you just said that the total profit in your back testing was \$2,255: that is excellent.

However, I am still working out a few of the details.  
That will come in time.  
So for now, **do NOT double up.**
