182 hit Midday

Now here is something new: the **Visual 85** system is telling me that a number from the bottom lines (4, 5, 6) will hit soon. I am thinking tonight or tomorrow. This brings the number down to 40 numbers. (**However, the Standard Strategy here is to play all 85 numbers PLUS the 40 numbers from lines 4, 5, and 6. This way you will hit the winning number TWICE.**)

Technically, today is done because of the two Rules below:

Rule: Only 1 hit per day.

Rule: If you hit midday, do NOT play the evening game.

So if I was playing, I would NOT play the evening game tonight since the system already generated a hit today (**182** for midday). Therefore, the prediction above applies to **tomorrow** (or **Friday** if one of the 40 numbers does not hit tomorrow Thursday.)

NOTE: The Basic Box will give you a different set of numbers for tomorrow of course so the 40 numbers will be different tomorrow.

Let's see what happens.
