

I am Predicting the 3rd Digit for NY

Let me clarify the prediction I made about the 0 hitting New York today.

This prediction is based on me tracking the three digits from the **Basic Box** program and noticing that the 3rd digit (see below: 7-9-**3**) is due to hit next because it has not hit since Wednesday the 24th when the three key digits were 9-4-**2** and 9**2**1 hit in the evening. Since then the 3rd digit has not hit...so it's due to hit.

However the 3rd digit for tomorrow Sunday is **3** – NOT 0.

Below is the full output of the Basic Box program for tomorrow, Sunday the 28th.

IF the 3 does NOT hit tomorrow Sunday, then I will focus on whatever the 3rd digit is for Monday.

Good for Sunday Dec 28

How to Reduce 85 Numbers to 21

The digit 3 did not hit today; the double 0s hit instead.

200 and **004** hit New York today, Sunday December 28, 2014.

I am going to stick to the same strategy; focus only on the 3rd due digit which for tomorrow is 9:

567 568 569 578 579 589 678 679 689 789 (85)

Now let me show you a pretty cool strategy.

I am expecting one of the 52 numbers to hit next: they usually hit soon after a blackout like today (two doubles).

I am also expecting one of the 36 numbers with the digit 9 to hit:

**019 029 039 049 059 069 079 089 129 139 149 159 169 179 189
239 249 259 269 279 289 349 359 369 379 389 459 469 479 489
569 579 589 679 689 789 (36)**

How can I use these two pieces of information? I can cross reference both lists on the **Group Matching System** program to find the 2-way matching numbers:

Basic 52

368 369 378 379 389 456 457 459 467 468 469 478 479**

I will now copy the 52 numbers above and the 36 digit 9 numbers onto the **Group Matching System** program.

It gives me this:

Group Matching System

 369 379 389 459 469 479** (21)

These 21 numbers are the only numbers I would focus on or play tomorrow Monday in New York. They can all be played for just **\$5.25** at 5dimes.com (0.25 cents).
