

Jan 3, 2015 Update: **The \$6600 System – Volume 2**

Recent Updates/Improvements

Check My Blog Every Day

I usually send an email every time I do a blog entry. However, I suggest you check out my blog at least once a day:<http://pick3master333.com/>

I say that because the email system I am using is a bit slow. I have my own email on my email list and I have noticed that sometimes I will send email in the morning and I will get it that night – or even the next day sometimes. If my email had to do with a prediction for the midday drawing that day, getting the email that night or the next day will be too late. Therefore, if you want to be up to date on my latest strategy or prediction, check my blog every day. If you are using my predictions to play the NY numbers, I suggest you check my blog every morning and every night – just in case.

Secret Reports: 3 Months Requirement

I simplified the requirements to get the secret reports. If you are paying month to month, you just have to be on my program for 3 months to get them. See the text on top of this page for more details:

New Reports

If you are a paid member, check the bottom of the Reports section at least once a week because now I am adding new reports on a regular basis. Below are two recent reports. **The 10 Lessons Learned report is brand new.**

The descriptions are below.

One Digit – 983 December 29 2014

People have been asking me for years for a system that would give them just one key digit. My answer was always, “no, I can only give you a system that gives you 2 or 3 digits, not 1.” Well, that is, until now. Using the Basic Box program, I have figured out a way to identify ONE digit with an excellent chance of hitting on the next two drawings. And most importantly, I show you how to reduce the standard list of 36 numbers down to a shorter list using the Group Matching System program. In the specific example I give in this report, I was able to reduce the list of 36 numbers down to just 21 numbers. And guess what? One of those 21 numbers hit on the very next drawing; and it had the exact digit I predicted (9). Read this report to learn all the details of this brand new system!

10 Lessons Learned

I wrote this report in real time. Meaning that you are reading what I actually predicted on my email list and on my blog would happen the next day. You will read on this report the actual emails and blog entries I made. In this particular case I predicted that the digit 0 would hit on Tuesday December 30, 2014. However, it did NOT hit. I even predicted that certain straight numbers would hit – and they did NOT. So this report is REAL. That is what happens in the real world; things don't always go the way you planned. By reading this report carefully you will see how I think. You will learn how I react to things when the game does not respond the way I want it to respond. And actually, it all turned out for the best because at the end I learned 10 things that will definitely improve my game from now on. These 10 lessons will improve your game as well. Read this report to learn 10 valuable lessons that will take your game to the next level!

New Home Page Text

There is a new Home page coming to <http://pick3programs.com/>

The new home page will reflect where I am now in the game and will say more about **Discovery 159** and the **Basic Box** program.

\$6600 Pick 3 System – Volume 2

Originally I thought I would go directly into Volume 2 and give the big secret away of how to make \$6600 a month. Now things are looking a bit different. Now I think it is more realistic to go step by step. And right now the next logical step is teaching the 5 betting levels of the system. You already know the first level: 0.25 cents for midday (\$21.25) and 0.50 cents for the evening (\$42.50) if you lose midday (Total: \$63.75). Well, there are 4 other levels beyond this one. I will teach these 5 betting levels in Volume 2.

And I think I have to address the biggest problem with this system which is this:
how do you deal with losing days, which means losing \$63.75 in one day?

What happens if you have two of these on the same week? These losing days can make the whole system fall apart fast. They can wipe you out in a hurry. I will explain how to deal with these on Volume 2 as well.

I am sure I will talk about other topics on Volume 2 but these two topics will be the most important ones.

This report should be ready sometime in March or before if I can find the time to write.
