

# New **ALPHA-14** Program Coming Up!

*Just **14** Numbers to Play – Get at Least **2** Hits Per Week!*

I have just taken my game to the Next Level.

I have a private program which allows me to code many numbers FAST based on the **Digit Distribution Box** (you will have to read my newly updated and very revealing **ALPHA-Report-1** to know what this means).

Bottom line is this: I entered the New York results of the last YEAR (734 numbers) onto this program and it gave me the corresponding codes. I then entered them onto the **Group Matching System** program and I instantly saw which codes hit the most. I found certain codes that keep hitting over and over again. I identified 14 in particular that hit 122 times or **16%** of the time in the last 12 months. I just set up a program that will give you the 14 numbers based on these codes! (There is another ALPHA program that gives you 24 numbers and one that gives you just **2 numbers!**)

If these numbers are hitting 16% of the time, that means that in a week (14 drawings) they should hit 2.24 times and in a month (60 drawings) they should hit 9.6 or about 10 times – which is VERY GOOD!

Assuming these numbers keep hitting as they have in the last year, that means that you would only have to play 14 numbers every day in New York in February and you will get **10 hits** by the time February 28 rolls around!

And just to give you a preview of this program, below you will see the text and how the output of this new program will look like. *This program should be up on pick3programs.com by this coming Monday or Tuesday.*

**Below is the TEXT for this new program:**

# ALPHA-14

January 23, 2015

This program is based on 734 codes covering a one year period in New York from Jan 23, 2014 to January 23, 2015. These codes are based on the Digit Distribution Box (read my secret "Alpha Report-1" for more details.). The 14 numbers this program gives you are based on the 14 codes that hit the most in the last year. They hit for a total of 122 times or about 16% of the time in the last 12 months. Assuming this trend continues...

These numbers should hit about 2 times per week (14 drawings).  
And about 10 times per month (60 drawings).

These number are to be played for both midday and evening for at least 7 days to see results. Enter the last 10 numbers that hit every night to get a new set of numbers for the TWO drawings of following day. NOTE: This program has to be updated on a regular basis because codes that are hot in a 6-month or 12-month period may not be necessarily hot in the next 6 or 12 months.

***See the next page to see the output of this program.***
