

Only Play the FIRST or SECOND Digit

I stayed up late last night analyzing the last **106** Basic Box hits and something became very clear: the FIRST and SECOND digits hit the most times.

They hit much more frequently than the third digit.

And they seem to hit an almost EQUAL amount of times.

Here are some recent examples.

126 hit Midday

Therefore, just pick one of these two digits.

This simplifies the game because now you have an easy decision to make; which of these **two** digits do I like the most?

A good strategy would be to look at the last 3 or 4 Basic Box hits and pick the digit (first or second) that has hit the **least** amount of times because this cold digit will play catch up in the next one or two days.

Secondly, **it is wise to play ALL 36 numbers for this one digit.** You will get a shorter playlist if you use the Basic 52 program shortlist, but you will tend to miss several hits if you don't play all 36 numbers.

Third, stick with your digit until it hits. In other words, if you decided you like the second digit, stick with it until it hits. Don't jump around.
