

# New ABC Tracking System (Coming Soon!)

I just found a way to make the ABC system even better by doing two things.

1----Put up a separate program that only gives the 85 A numbers.

2----All the 85 numbers will be arranged by position.

This will make it easy to track all the A numbers.

Let me show you what I mean:

The 85 numbers will be arranged the normal way. Example:

012 013 015 016 017 019 025 026 027 028 029 034 037 038 039  
045 047 048 049 057 067 123 124 125 127 135 136 137 138 145  
146 147 148 149 156 157 158 167 169 179 234 237 238 245 247  
248 249 256 258 259 267 268 269 278 279 345 346 347 349 358  
367 369 378 379 389 456 458 459 467 468 469 478 489 567 568  
578 579 678 679 689 177 223 255 344 799 (85)

And also by position:

**Position 85: 159 = Hottest Number**

Position 84: 123

Position 83: 048

Position 82: 124

Position 81: 279

Position 80: 468

Position 79: 346

.....

.....

.....

.....

.....

Position 3: 379

Position 2: 045

**Position 1: 006 = Coldest Number**

The strategy here is to track these 85 A numbers.

Specifically, you want to pay attention to the low numbers because they will be followed by the top high position numbers.

The low numbers are in positions 1, 2, 3, 4, 5....all the way to 15 or 20.

My theory is this: **two or three of these low position numbers hitting back to back will be followed by the high numbers in positions 21 to 85 (65 numbers).**

Now, lets say that I see that the last three A numbers that hit came from positions 5, 12, and 7 (5-12-7).

In this particular case I would be willing to **JUST PLAY THE TOP 50** numbers.

I would of course back test this first, but I am sure that after three low position numbers hitting, high position numbers will follow. **This is a BIG improvement over the 75 numbers I have now for the ABC programs.**

**This simple tracking system will dramatically increase the profitability of the ABC system!**

So now you will have two options: play all 85 numbers (which by the way will almost always hit after just TWO or THREE misses: see **Texas** to see what I mean) or you can just play when you see the right triggers: low numbers hitting in the last two or three drawings...in which case you would only play 65 to 50 numbers.

I think I will add this tracking system program for Texas first....then New Jersey, then NY...then Florida.

I will keep you updated on this brand new system.
