

# NEW Pair Strategy

I just found a really cool strategy. For this strategy you use the results of the last 30 days (the last 60 drawings). I will use the last 60 drawings in New York starting from April 30, 2015 as an example. NOTE: Always enter the numbers starting from the most recent first (315 and 701 hit on April 30) and then work your way back (547 and 205 hit on April 1).

As you can see below, the Pair Frequency Finder program is telling me that the hottest pair in April was 34. Now, here is what you do; find the next pair that has a 3 or 4, which in this case is 47.

When you combine these two pairs, you come up with the number 347.

Guess what happened?

The number 437 hit New York on May 2, 2015.
