

Revelation 4X

I just discovered an amazing system.

I call this system Revelation 4X. I am going to show you how this system works using the numbers that hit New York on **May 3, 2015: 730 and 728** because this system predicted the number 730. For this system, you use the **Revelation 4** program (a Reference Box program that converts all numbers to their box format) 4 times (that's what 4X means).

This means that you get the results of the program using the last 40, 30, 20, and 10 numbers. The assumption of this system is that at least one of these Revelation Boxes will have the winning number...in the TOP TWO LEVELS, which represents 8 numbers or less.

Below you see the output of the program for the last 40 NY numbers starting from **May 2: 437 921 053 073**.....and so forth. Under that you see the output of the program for the last 30, then the last 20, and then the last 10 numbers. I have the top two levels in **red** because this system assumes that the winning number will come from the **top two levels**.
