

Track Extreme Movements on the Hit Parade

I may be using the Hit Parade incorrectly. It may be best to just pay attention to extreme movements. For example, I have noticed that numbers from low lines (7-8-9-10) are almost always followed by numbers from the top lines (1-2-3). Tracking these “extreme” movements may be the **best way** to use this list. In other words, **you would play the top numbers after seeing numbers from the bottom hit.**

FOR EXAMPLE: 649 (469) hit New York last night, which is in line 9.

Guess what just hit NY? 802 (028) which is on line 2.

9--389 456 457 458 467 468 469 478 479 489
 10-567 568 569 578 579 589 678 679 689 789

This is what I should have done:

After seeing this trigger (line 9), I should have expected a number from the top to hit (lines 1-2-3), which means using the **Hit Parade 50** list and program. **But I need key digits to cut down the list.**

Where do I get these digits?

From the **Basic Box** or **Super Six** programs (which will give you the **same** basic **three** key digits).

These are the previous NY numbers:

649 993 212 352 565 800 514 816 111 910

STRATEGY: Enter the three key digits (1-2-8) into the
Hit Parade 50 program, which gives me this:
