

60 Draw Top Pair Strategy

The Straight books are good for 15 days, but they will still be useful afterwards because they have a very useful **list** of numbers for each state that you can run “experiments” on with the programs. Let me give you an example of what I mean right now.

Open up your **Straight-1** book and look at the Florida numbers. It gives you Florida numbers up to July 27, 2015. The page with the numbers looks like this:

Now, copy the top numbers onto the **Group Matching System 60** program. This is **not** to get a matching list. This is to get a group of exactly 60 numbers (no need to count out 60 numbers, let the program do it for you).

Ok....here is the list.

The program automatically deleted every number past the 60th number.

The top pair here is **17**. In other words, the top pair in Florida on July 27, 2015 was 17 (based on the last 60 numbers from that day.)

Now, look at the two digits below: **4** and **6**.

I have found that these 2 digits tend to “hook up” with the top pair.

So you have two numbers here: **174** and **176**.

Here is what happened soon after:

RESULT: **167** hit Florida two days later on July 29.

RESULT: **174** hit straight 6 days later on August 2!

Here is another example from North Carolina.

56	7	4.242

The two numbers here are **892** and 896.

RESULT: **892** hit straight four days later on July 31.

Strategy: Write down somewhere the top pair in your state right now based on the last 60 drawings and use the next two digits to create two numbers. Don't be surprised if one or both of them hits soon after! **Sometimes these numbers hit straight!**
