

256 Just Hit New York

The game is playing games with me.

But that's fine - I will end up beating it!

Anyway, here is my “**prediction list**” for today. I came up with this list this morning (that is the BEST way to learn: write out your prediction **before** every drawing; and then see what happens, and always learn from it).

453+127=2-Way Match:

037 047 057 134 135 136 137 138 139 145 146 147 148
149 156 157 158 159 234 235 236 237 238 239 245 246
247 248 249 **256** 257 258 259 347 357 457 (36)

As you can see, 256 is on the list - it just hit New York.

Let me explain what 453 and 127 mean.

First of all; I know that digits 4, 5, and 3 are due in the middle. In other words, these types of numbers are due in New York:

x4x, x5x, x3x

You can see this fact very clearly on the (partially filled) tracking sheet below (read SECRETS-2 to see all the digits). After 279 and 127 hit New York, I knew that a 4, 5, or 3 would be hitting in the middle soon.

Now check this out: I am getting confirmation that a 5 and 4 will hit from the **Code-Key** match program.

Code-Key Match

10 Numbers used: 127 279 057 045 023 448 048 238 237 689

Code-054

Keys-38

Match: None

Here is the program on the menu:

Florida

> FLORIDA ABC

> FLORIDA ALPHA-2

> FLORIDA ALPHA-14

Texas

> TEXAS ABC

> TEXAS ALPHA-2

Good Programs

> DTD 33

> CODE-KEY MATCH

> CODE-64

> CODE-3-BASIC

So that explains the **453**:

453+127=2-Way Match:

Here are all the singles in the Pick 3 game with a 4, 5, or 3 in the middle:

034 035 036 037 038 039 045 046 047 048 049 056 057 058 059
134 135 136 137 138 139 145 146 147 148 149 156 157 158 159
234 235 236 237 238 239 245 246 247 248 249 256 257 258 259
345 346 347 348 349 356 357 358 359 456 457 458 459 (58)

What does **127** mean?

After seeing 172 hitting after 279, I am seeing that digits ARE repeating.

I know...I am going back and forth here....but **I am responding to what is in front of me, what is really happening** - NOT to my opinions of the game.

So the digits ARE repeating.

Therefore, I figure that after the 172 hit New York last night (127 box), at least one of the digits would repeat. So I was looking for **1, 2, or 7** to repeat today for midday. (That is what **127** means).

Here are all the numbers with a 1, 2, or 7 in the Pick 3 game (enter these digits on the **120-Singles-Only** program)

012 013 014 015 016 017 018 019 023 024 025 026 027 028 029
037 047 057 067 078 079 123 124 125 126 127 128 129 134 135
136 137 138 139 145 146 147 148 149 156 157 158 159 167 168
169 178 179 189 234 235 236 237 238 239 245 246 247 248 249
256 257 258 259 267 268 269 278 279 289 347 357 367 378 379
457 467 478 479 567 578 579 678 679 789 (85)

You should know what happens next.

That's right; copy both lists into the **Group Matching System** program. Here is what I got:

Group Matching System

143 Numbers used: XXX

2-Way Match:

**037 047 057 134 135 136 137 138 139 145 146 147 148
149 156 157 158 159 234 235 236 237 238 239 245 246
247 248 249 256 257 258 259 347 357 457 (36)**

256 just hit New York for midday (Thursday December 17).

IF YOU CAN UNDERSTAND WHAT I DID HERE AND **WHY I DID IT,
YOUR GAME SHOULD IMPROVE DRAMATICALLY!**

The Pick 3 Game

December 17, 2015.
