

Lesson Learned

I just learned something. The information I get from tracking the numbers based on the Master Reference Box (which I described in detail in SECRETS-2) is **more accurate** than the draw to draw digit system I posted about. I predicted digits 0 and 5 for New York--- AND I made a “private” prediction to my VIP group: I said that xx8 or xx9 would hit because of the upward trend you see below.

My digit 0 and 5 prediction did not come true, **but my prediction of an 8 or 9 hitting in the third position DID come true: 279 just hit New York.** If you read SECRETS-2, the chart below should look familiar (I removed most of the digits).

MONDAY			TUESDAY			WEDNESDAY		
14-Dec-2015			15-Dec-2015			16-Dec-2015		
4	4	8	0	4	5	0	5	7
0	4	9	0	4	9	0	4	9
		8	1				5	8
							3	7
4				5				
							7	
		3						

The upward **3-5-7** trend “predicted” that an 8 or 9 would hit soon in the third position – and it just did in **279**.

[illegible]

LESSON: Stick with this tracking system; it's more accurate.

To get the full tracking system (with all the digits in the boxes),
I suggest you read SECRETS-2. You can email me if you want the

PDF at aa2newyork@aol.com

or you can buy it from Amazon here:
