

The 10 Number System

(Part 4)

If you play New York Numbers, I hope you noticed what just happened.

First, a little back story:

I explained the **10 Number System** in Books 26, 27 and 28. I did not say much in Book-28, but it was significant; I said to CHART the hits and misses from the 10 numbers.

Let me summarize the 10 Number System for you:

When the 10 numbers from line 10 do NOT hit one week, expect to see one of the 10 numbers hitting the following week, most likely in the first 5 days: Sunday, Monday, Tuesday, Wednesday, or Thursday. (I call these 5 days the Red Zone. Friday and Saturday are the End Zone.)

Sun	Mon	Tue	Wed	Thu	Fri	Sat
112	178	018	479	466	048	069
115	239	368	258	014	237	124

This is especially true after **TWO** weeks have gone by without a hit from line 2 **IN TWO DRAW PER DAY STATES**.

That last part is very important; this system is not as predictable in one draw per day states; **Arizona, Colorado, Minnesota, and Nebraska**. I have seen up to 6 weeks go by with no hits from line 2 in these states...so the 10 Number System works best in states that have 2 drawings per day.

Now I will explain what just happened in New York.

No number from line 2 hit NY in Book-26.

**That's 2 consecutive weeks with no hits; that's the
trigger for at least one of the 10 numbers hitting
THIS week (actually, ONE week of no hits is a
trigger, so two weeks is a "super trigger").**
