

16 Straight Numbers for Pick 4

Here is the Pick 4 version!!

**Remember: 5dimes pays
\$9,000 on a \$1 Straight Hit!**

**But even a 0.25 straight hit
is good; it pays \$2,250.**

Program Instructions

This program maintains the straight format of all the numbers entered and gives a 3 level Reference Box (straight). It then gives the **16 straight numbers** based on the top two digits which will be (23) X (75) X (17) X (01) in the example below.

2 7 1 0
3 5 7 1
5 6 9 8

2710 2711 2770 2771 2510 2511 2570 2571
3710 3711 3770 3771 3510 3511 3570 3571

TEXT:

This is an experimental program. Enter 100 numbers starting from the last number that hit on SATURDAY NIGHT. Keep going back until you have 100 numbers. Don't worry if you enter more than 100 numbers; the program will only use the first 100 numbers and delete the rest. This program maintains the straight format of all the numbers entered and gives a 3 level Reference Box based on the 100 numbers. Under the Reference Box you will see the 16 straight numbers based on the top two digits in the first, second, third and fourth positions. These 16 straight numbers are good for the next ONE or TWO WEEKS. At this point I am not sure if there will be enough hits the following week; so I am adding the second week just in case. I will update this program based on the feedback I get in the next few weeks. Today is June 17, 2016.

The output will look like this:
