

8 Straight Numbers for Pick 3

NEW Experimental Program!

I had an idea last night; **what if I used 100 numbers on the Reference Box (which maintains the straight format of the numbers entered) starting from Saturday night – and then I played the top 8 straight numbers the following week or two?**

Would any of the 8 straight numbers hit the following week?

Or maybe the week after?

Well, we (me and you) are about to find out....SOON!!

Below you will see the program instructions I just sent my programmer. You will see the layout of this new program and the text or instructions that will come with this program.

If you currently have access to my programs, you will be able to test out this STRAIGHT number program in your state – starting later today or tomorrow!

Here is what I suggest; go back to WEEK 1 and add 40 numbers to the END of the 60 numbers (so you have 100 numbers) and enter them into this program. Look at the 8 straight numbers.

Then LOOK to see if any of them hit straight in the next 14 days.

REPORT BACK TO ME WHAT YOU FIND OUT!!

I will be back testing all 39 weeks for New York.

By the way, this is EASY because there is NO CODING Required!

All you do is look to see if any of the 8 straight numbers hit in the next week or two.

I will be putting up a Pick 4 version of this program as well! It will give you 16 straight numbers to play!

Below are the instructions for this new program.

Program Instructions

This program maintains the straight format of all the numbers entered and gives a 3 level Reference Box (straight). It then gives the **8 straight numbers** based on the top two digits which will be (09) X (47) X (97) in the example below.

0 4 9
9 7 7
1 5 8

TEXT:

This is an experimental program. Enter 100 numbers starting from the last number that hit on SATURDAY NIGHT. Keep going back until you have 100 numbers. Don't worry if you enter more than 100 numbers; the program will only use the first 100 numbers and delete the rest. This program maintains the straight format of all the numbers entered and gives a 3 level Reference Box based on the 100 numbers. Under the Reference Box you will see the 8 straight numbers based on the top two digits in the first, second and third positions. These 8 straight numbers are good for the next ONE or TWO WEEKS. At this point I am not sure if there will be enough hits the following week; so I am adding the second week just in case. I will update this program based on the feedback I get in the next few weeks. Today is June 17, 2016.

They should get an error message if less than 100 numbers are entered.

The output will look like this:
