

9 STRAIGHT HITS – and its only Thursday!

System 88 Update

I have to go back to the drawing board on the system I am using to identify the hottest 8 digits because I just realized that **I MUST include the coldest digit in the 60 numbers entered.** For example, here are the 60 numbers for NY starting from Saturday July 16.

894 771 791 259 749 827 292 558 717 826 671 207 669 719 191 136 901 267 519 230 148 854
575 717 774 153 178 109 941 322 680 584 144 875 858 266 284 130 338 141 092 448 631 435
181 216 477 723 655 288 806 105 889 780 742 901 617 152 850 355

In the next page you will see the output of the **Visual Digit Distribution** program and as you can see, the coldest digit is **3**. I just realized that this digit **MUST** be one of the 8 digits used in System 88.

3 is the coldest digit in the 60 numbers.
It must be one of the 8 digits used in System 88.

059 068 255 427 425 558 559 515

Now let me show you the NEW way I am testing out to get the 8 hottest digits for System 88. On the next page you can see the output of the Visual Distribution program for these 17 numbers. Notice that 502617 are obviously the six hottest digits.

5 0 2 6 1 7

And if you recall from Book-44, I must add a 9 to this list because there is a 6 on the list:

502**6**17**9**

Ok....that's 7 digits....I need one more. The 8th digit will be the coldest digit in the 60 numbers entered; 3. So the 8 digits are: 502617**93**.

Arranged from lowest to highest: 01235679.

This means that the **Negative Keys** are 4 and 8.
(I explained Negative Keys in Book-44).

Now let's test my theory.

And just to be clear, that theory (besides **Rule 69** which I explained in Book-44) is that **the coldest digit in the list of 60 numbers entered must be one of the eight digits used in System 88.** It is now Thursday night July 21 and here are the 10 numbers that have hit New York so far this week:

696 900 113 595 033 252 328 792 126 636

Guess what? 9 of out these 10 numbers are on the list!!

696 900 113 595 033 252 328 792 126 636

THIS IS CRAZY!!!!

That's 9 Straight Hits in 10 Drawings!!

So what have we learned here?

FIRST: The basic strategy is to (A) identify the hottest codes for your state (B) get the corresponding numbers for those codes, and (C) enter those numbers on the **Visual Digit Distribution** program. This may be more accurate than using the Revelation 4 program.

SECOND: **The coldest digit in the list of 60 numbers used MUST be one of the 8 digits.** Again; the first number on this list is the **LAST** number to hit your state on **SATURDAY NIGHT**. You start from there and go back (evening, midday, evening, midday) until you have 60 numbers.

THIRD: **Rule 69** is **SOLID**. It works! (See **Book-44**).

I will say more about this in Book-45 (out this coming Sunday) and Book-46. I just wanted to give you this update NOWbecause as you can see....it's a **GOOD ONE!** **I have never seen a system produce 9 straight hits in 10 drawings!**
