

A Radical Conclusion

The numbers based on the hottest codes for New York are NOT hitting.

However, the hottest DIGITS based on the hottest codes ARE hitting.

Actually, they hit almost every day.

I have been seeing 9 to 10 of the 14 numbers that hit during the week being predicted by the 8 **digits** from **System 88** (which are the 8 digits based on the hottest codes).

And for this week, the two **Negative Keys** in New York are 3 and 7 (these are the two coldest digits), making the 8 hottest digits be **01245689** (see the STRAIGHT playlist for these digits on the next page).

885 just hit New York, and it's on the list.

So is 959, 558, and 458.

This is making me come to an inescapable conclusion.

Here is the conclusion:

FORGET ABOUT the NUMBERS based on the hottest codes.

Instead, **focus on the hottest DIGITS predicted by the hottest codes.**

Use the DIGITS to predict your numbers, NOT the codes.

Yea....I know....this is a radical idea – but it's the logical conclusion based on the FACTS; the DIGITS are hitting - but the numbers based on the hottest codes are NOT hitting.

I will discuss this in more detail in the next book, Book-46, out this coming Sunday.

By the way, this may be IT.

This may be the **Final Solution** to the Pick 3 riddle.

In other words, you identify systems that give you DIGITS (not numbers) with a good chance of hitting in the next 7 days.

You use these digits to create your numbers.
