

Pair Frequency Finder 100

Over the next one or two weeks I will be discussing a very powerful system using the hottest pairs in the last 100 numbers that hit your state. However, you can start using this system now; just enter the last 100 numbers that hit your state into the Pair Frequency Finder program.

I just sent Mike (my programmer) instructions on making a copy of this pairs program that only works with 100 numbers. The instructions I sent are on the next page. The program instructions explain my pair system. This program should be up in a day or two – but you can start using this system right now using the regular Pair Frequency Finder program that is already up; just make sure you use 100 numbers. Keep in mind that the numbers you get may not hit right away – but they will hit. This is actually a great system to use on the last day of the month; the numbers you get will be good for the coming month.

Program Instructions.

Copy a large list of numbers into the top input box and then press Run System. This program will only use the first 100 numbers on your list and delete the rest. On the output you will see all the pairs arranged by frequency with the hottest pair up on top and the coldest pair on the bottom. **Look for matching digits in the top 1 to 5 pairs to create hot numbers.** For example if 14 and 04 are the top two pairs, they make up the number 014. If the top three pairs are 08, 68, and 56, they make up the numbers 068 and 568. There is a good chance that one or more of these numbers will hit in the next 1 to 30 days. This is an excellent program to use on the last day of the month. The numbers you get (made up of the hottest pairs in the last 100 numbers that hit your state) will be good for the coming month. However, sometimes one of these numbers will hit in a week or two.

The output will look like this:

The program will go here on the menu:

- > BOX POSITIONAL CONTROL
- > HOTTEST FRONT PAIR
- > **PAIR FREQUENCY FINDER 100**
- > PAIR FREQUENCY FINDER 40
- > PAIR FREQUENCY FINDER
- > BOX-TO-STRAIGHT

Next I will briefly explain the Win 4 version of this system.

How to Find **ONE** Super-Hot Box Number To Play in the Win 4 Game

The 100 number version of this program is already up for the Pick 4/Win 4 game. However, you have to be a VIP or Gold member to access this program.

The strategy is the same: use the top pairs to create numbers. HOWEVER....

In the Win 4 game, **you are looking for ONE number made up from the top pairs.**

For example, assuming you get this output:

Pair Frequency Finder-100

The top two pairs above make up ONE number: **4957.**

This number is good for the next 30 days.

This number is box: you would have to play it 24 ways to guarantee a straight hit if it hits (you can use the **Box-To-Straight** program to convert box numbers into straight Win 4 numbers). However, I suggest you back test this system in your state first before playing these numbers straight.

In the example below, the number would be **2549**.
