

# The 4-Due Pairs Program Will Be Updated

This program will be updated soon (most likely in the next 48 hours):

Pairs Programs

> 1-DUE PAIR

> 2-DUE PAIRS

> 3-DUE PAIRS

> **4-DUE PAIRS**

> PAIR-REMOVAL

> DUE PAIRS-60

This program will now list the 40 box numbers corresponding to the 4 most due pairs. As it turns out, one or more of these 40 numbers tends to hit in the next 1 to 14 drawings. If 40 numbers sounds like a lot of numbers, don't worry because I will soon be sending out a report explaining how to reduce this list. Also, **there are 8 hot DOUBLES on this list of 40 numbers so if you play doubles, you should pay attention to these 8 doubles.** Below are the new updated instructions that will come with the 4-Due Pairs program.

Enter the last 100 numbers that hit your state starting from the most recent and going back (midday, evening, midday, evening... etc.). This program will start removing box pairs starting from the most recent number that hit your state. For example, if 369 is the most recent number that hit, this program will remove pairs 36, 39, and 69 from the 55 pairs in the Pick 3 game. If 250 hit before that, it will remove pairs 25, 02, and 05, and so forth. This program will continue removing pairs until there are 4 pairs left. These are the 4 coldest and therefore the 4 most due pairs. There are 40 box numbers that correspond to these 4 due pairs and one or more of these 40 numbers will hit in the next 1 to 14 drawings. These 40 numbers are listed in the output of this program. There are always 8 doubles in this list of 40 numbers and they are listed in the output as well. I explain a way to identify the most due pairs using a basic pen and paper system in an old post. The strategy starts in the middle of page 32 and ends on page 33. Here are the links to these two pages:
