

# Losing Weeks are Followed by Winning Weeks

Here is something you should keep in mind:

Winning and losing are two sides of the same coin. They go hand in hand. This means that when you use this system you are not going to win every week – but you are not going to lose every week either. And something that you should be on the lookout for is a **LOSING week** because they are triggers for a winning week. I mentioned this earlier but it's worth repeating; after a losing week (none of the 20 numbers from the two hot pairs hit) you will see a winning week where you will see 2, 3, or even 4 hits. **This is NOT theoretical; it's real.** I got 4 hits from this system during the week of March 4 to March 10; 665, 365, 836, and 363. You can see pictures of my hits here:

<https://pick3master333.com/box-hits/>

(Visit this page on a regular basis so you can stay up to date on my wins. As you can see, I put a divider separating the weeks. This will make it easy to see the Winning Weeks and the Losing Weeks. When a week gets no hits, I will indicate that on the page as well.)

I got 4 hits during the week of March 4, 2018. However, if you were playing New York numbers you should NOT increase your bet the following week thinking that this trend (4 hits per week) will continue; that is foolish. In all likelihood you may see NO HITS or just one or two hits the following week.

That is what happened the following week (March 11-17)  
I got TWO hits: 069 and 490.

Guess what should be coming up SOON?  
That's right: **a LOSING WEEK.**

I am writing this at the end of the following week (March 18 to March 24); it is now Saturday morning (March 24) and so far there have been **NO HITS this week** from the two hottest pairs for this week in New York: 17 and 67. But this is to be expected given what happened in the previous two weeks: 4 hits followed by 2 hits. If there are no hits today (midday or evening) it means that **this was a losing week** – which means that next week (March 25 to March 31) will be a **WINNING week.**

| 4   | 5   | 6   | 7   | 8   | 9   | 10  |
|-----|-----|-----|-----|-----|-----|-----|
| 495 | 762 | 363 | 710 | 836 | 917 | 365 |
| 927 | 286 | 768 | 406 | 831 | 389 | 665 |
| 11  | 12  | 13  | 14  | 15  | 16  | 17  |
| 490 | 069 | 649 | 155 | 088 | 325 | 309 |
| 796 | 681 | 550 | 228 | 712 | 314 | 629 |
| 18  | 19  | 20  | 21  | 22  | 23  | 24  |
| 882 | 345 | 511 | 568 | 921 | 924 |     |
| 499 | 794 | 095 | 522 | 244 | 836 |     |
| 25  | 26  | 27  | 28  | 29  | 30  | 31  |

So this is what you will see when you use this system: a winning week of 4 hits will be followed by a winning week of 2 hits, then a losing week, then a winning week, then another winning week, and another – then a LOSING week (I have not seen TWO back to back losing weeks yet; but it's possible). After the losing week you will see a winning week, then most likely another winning week (most weeks will be **winning weeks**), and then a losing week...and so forth. The sequence will look something like this:

**Win-Win-Win-Lose-Win-Win-Lose-Win-Win-Win-Lose-Win**

Below is another way of looking at this: the indicator will tend to swing to the left (WIN) most of the time, but from time to time it will swing to the right (LOSE). **Don't be alarmed by this because after this loss it will swing back to the left (WIN).**

*This is a chapter from my **7 Day Coding System** report. This 220+ page PDF report will explain my coding system in detail. It contains many chapters explaining how to do my coding system by hand (Pen and Paper Systems; NO programs required). I also explain how to code the Pick 3 game quickly using Excel and my programs. This report will be released soon; I say sometime around April 14. This report supplements my Coding Program: <https://pick3master333.com/best-system/>*

*However, this report will **not** be included with the training. This will be a separate stand-alone product priced at **\$60**. This report will include the EXCEL sheet that I provide with my Coding Training program; **so the \$60 will give you both a 220+ page PDF report and an Excel sheet to do the coding on**. Once you learn the information contained in this report, you will be able to code the Pick 3 game in your state on your own using Excel and my programs – OR using the Pen and Paper Systems explained in the report that do NOT require the use of my programs.*
