The Ultimate System
Delayed

I recently sent out **The 14 Number System** report. This report has my most advanced Pick 3 system. It includes an Excel sheet that is already formatted to give you the hottest pair and numbers for New York once the distribution digits are entered on Saturday night (if you are in another state; learn my coding system and then code the last 20 weeks to identify the hottest pair and codes in your state; then replace the codes in the sheet with the hottest pair and codes in your state).

At the end of the 14 Number System report (which is 100% FREE) I mention **The Ultimate Pick 3 System** report. This report will be delayed. I will take my time writing this report because I want it to be exactly what the title says; I want it to be the Ultimate Pick 3 system. This means that the system I explain in the report has to be based on facts; not theory. It will take some time for me to validate the theory that I have in mind (which should work; but I have to see it work in real time).

The 14 Number System is based on a fact. That fact is that the hottest pair in the last 40 weeks tends to hit over and over again in the next 7 days. This has proven itself to be true over and over again; I no longer question it (this is pair 79 in New York; it may be another pair in your state).

The Ultimate Pick 3 System will be the by-product of me adding something else to this pair, thereby making the system I explain in the 14 Number System even better (this means that the foundation of the Ultimate System is playing the 10 numbers that correspond to the hottest pair; I will just be adding something else to the mix to make it even better).

Once I see real-world proof that my theory is correct (this can take a few MONTHS), then I will write the report (if you requested the report, I saved your email; I will send you the report once it's completed). The report will also be available for everybody else to purchase.

Pushing Through Complexity

The other issue I want to address is the complexity of my coding system.

Yes, my system is complex – but only in the beginning. Most people see this complexity and call it quits right there. They would "get it" and learn the system if they persisted and go through it **again, and again, and again.**

Basically, what you have to do if you want this (or anything else in life) is "push through" the initial complexity of anything you want to learn. **This is done by going over the material (book, report, video, seminar, etc.) over and over again until you understand the system completely. This means that you can simplify things with a little persistence.**

<mark>EXAMPLE:</mark> I mentioned in a previous post that I will be spending more and more time in my Real Estate career in the coming months. What I did not mention is that the investing system I will be using is **very complex;** it is completely over my head. I first learned the system via a book, then videos, then a live seminar (I had to travel to Vegas) - BUT I still did **<u>not</u>** understand it completely (Real Estate investing is a whole new world for me).

Did I give up because the system was complex?
NO.

Here is what I did to understand the system:

- **I re-read the book again.**
- **I watched the videos again.**
- **I took the seminar AGAIN (which was not cheap because it involves paying for travel and hotel stay).**
- **I took the SAME seminar 3 times this year: in February, April, and most recently in July (I spent about $800 per seminar).**

Guess what?
Now I understand the system!
(But only because I went over it again and again).

The same idea applies to my coding system. You can simplify it and make it understandable - but it will require that you read **The Coding Report** a few times. It may also mean taking the **Training** again (if you took it before).

I can also help you out with a **FREE Test.**

Request a Free TEST
8 Keys to Coding Success

If you read **The Coding Report** or took my **Training** and you want to test your coding skills, you can do this; first email me the 40 number report for NEW YORK **for the last two Saturdays where numbers hit in the next 7 days** (today is August 24, 2018; so it would be Saturday **August 4** and also Saturday **August 11**). NOTE: Do not get hung up that this is not your state; the coding process is the SAME for ALL states.

August 2018

Sun	Mon	Tue	Wed	Thu	Fri	Sat
29	30	31	1	2	3	4
			288	011	979	024
			456	288	576	134
5	6	7	8	9	10	11
232	509	835	927	420	793	571
214	757	953	814	500	046	730
12	13	14	15	16	17	18
471	193	607	503	238	925	051
976	135	812	605	319	677	228

Write this on the subject line of your email:
TEST-40 NUMBER REPORT-NY (this tells me that you are requesting a test). Attach the two 40 number reports (on a Word document) to the email.

That is the first step of the coding process; getting the 40 number distribution using the last 40 numbers that hit, starting from the last number that hit on Saturday night.

After seeing that your distribution is correct, I will ask you to code the two weeks. Using the example above…

2-You would use the **AUGUST 4** distribution to code the week of **August 5 to August 11. This coding is done on Excel. You should have the Excel sheet if you took the Training. If you don't have it, ask me to send it to you.**

3-You would use the **AUGUST 11** distribution to code the week of **August 12 to August 18.**

4-Email me the Excel sheet and I will look over the codes. I will show you if there are any corrections that have to be made.

5-The first test is FREE.

6-Any additional tests will be $15.

7-In addition to pointing out any errors, **I will also give you additional tips and tricks to improve your coding skills.**

8-If you keep doing this (re-testing, making corrections, getting better and better), it will only take you a few tests to really master this coding system.

What is the alternative?
You keep **losing money** playing Pick 3 ---or you quit and find another less expensive hobby.

To sum up:

1-I will first get real-world proof that the theory I have in mind for the Ultimate System works. Once I get this proof (with actual winning numbers), I will send out an email announcing that the report is ready.

2-If you currently find my coding system complex; do not let this initial complexity scare or discourage you; re-read and study **The Coding Report** again, and take (or re-take) the **Training** again.

3-You can request a FREE test to see how good (or bad) your current coding skills are. Additional tests will be $15. With every test you take, your coding skills will get better and better.

4-Do this NOW. Once I am really deep into Real Estate,
I will not have time for this.
