

# How to Win \$750, \$1500, or \$2250 - Every Time You Hit!

I am investing a great deal of time and energy perfecting my Win 4 system because it is very clear to me now that the REAL money maker is the Win 4 game – whereas the Pick 3 game is just a form of expensive **entertainment**.

That's right – the Pick 3 game is something you do for fun. You are NOT going to make a lot of money (\$5,000, \$10,000, \$20,000, etc.) playing Pick 3 (sorry to burst your bubble).

**If you want REAL money, you focus on** (and come up with a strategy that works for) **the Win 4 game**. This, of course, is difficult to impossible for most people (the odds are 1 in 10,000) – until now.

Win my coding system, I can do in the Win 4 game what I have been doing in the Pick 3 game; WINNING.

And not only that, but getting **STRAIGHT HITS**:  
<https://pick3master333.com/box-hits/>

What I am saying is that if I just focus on the Win 4 game, I can perform MIRACLES: like getting straight hits **consistently**.

I just took a big step to making that happen with a new Win 4 program that I will be putting up called **New York Super 6**. This program will give you 6 super hot Win 4 numbers for the New York Win 4 game; 1 single and 5 doubles; these are box numbers. This is VERY IMPORTANT: **The single can be played 24 ways to guarantee a STRAIGHT hit in 1 to 8 weeks. This is the average. Sometimes you will see TWO straight hits in a quarter.**

There are 4 quarters in a year (Q1, Q2, Q3, Q4).

Q1: JAN-FEB-MARCH

Q2: APRIL-MAY-JUNE

Q3: JULY-AUG-SEPT

Q4: OCT-NOV-DEC

NOTE: I said previously that I would not be putting up any programs based on my coding system because they will have to be updated constantly – but I am making an exception here because there is **so much money** to be made in the Win 4 game and I KNOW how to do it now (I am learning more and more about my coding system every week).

Something that will be different with the Win 4 game is that the hits will be bigger (of course) but they will also be further apart; getting hits EVERY WEEK is not a realistic goal in the Win 4 game; you have to think in terms of MONTHLY hits.

Insofar as getting STRAIGHT hits, you can do so – ONCE in a two month period (8 weeks) or TWO hits in a quarter (we will soon be in the last quarter of the year: OCT-NOV-DEC). I am basing this on the hottest code in New York (2347) which hit 7 times in 44 weeks (10 months).

The new Win 4 program I will be putting up will give you one single (this is the BEST number to play 24 ways to guarantee a STRAIGHT hit in a TWO month period) and 5 DOUBLES (which pay **\$750** if played \$1 box at 5dimes.com). You should see one or two of these doubles hitting New York in a MONTH; two hits will pay you **\$1500** = \$750 X 2.

And if you do what I will be doing (playing the single on the list **24 ways** for 0.25 cents at 5dimes.com) you will have a **\$2250** payday in 1 to 8 weeks (that is what 5dimes pays on a 0.25 straight hit on the Win 4 game: \$2250).

## SECRETS REVEALED

I will now save you a great deal of time and effort if you play the New York Win 4 game. Below are the 6 codes that my new program will be based on (this is all based on my **7 Day Coding System**: <https://pick3master333.com/best-system/>

Assuming this distribution.....

0	1	2	3	4
5	6	7	8	9

These are the 6 Hottest Codes (I am only focusing on the TOP single and the top 5 doubles):

2	3	4	7
1	1	4	6
2	2	4	9
2	6	6	9
3	5	7	7
4	4	5	6

Below are the program instructions.

I reveal a lot here; **so read this carefully.**

The payouts I guarantee (\$750, \$1500, \$2250) assume that you are playing the numbers \$1 box at 5dimes.com and 0.25 cent straight when the single is played 24 ways to guarantee a straight hit when it hits (usually in 1 to 8 weeks). I also assume that a month has 5 WEEKS to account for those months that have 5 SATURDAYS (like SEPT and DEC 2018).

This program is for the New York Win 4 game and it is based on the 40 number distribution. Use this program on Saturday night; enter the last 40 Win 4/Pick 4 numbers that hit New York, starting from the last number that hit that night. This program will give you 6 hot Win 4 numbers (1 single and 5 doubles). The 6 numbers will be good for the next 7 days or 14 drawings (Sunday to Saturday). Expect to see 1, 2, or 3 of these numbers hit in a MONTH. The first number (the only single on the list) will hit about ONCE in 2 MONTHS or 8 weeks. This number can be played 24 ways to **guarantee a STRAIGHT hit**. To maximize profits, I suggest playing these numbers at 5dimes.com for \$1 BOX. If all 6 numbers are played \$1 BOX, it will cost **\$84** to play them for the week (\$6 per drawing X 14 drawings). It will cost \$420 to play the numbers for the month (\$84 X 5 weeks). You will win **\$750** every time one of the DOUBLES hit. You should see one (**\$750**) or two (**\$1500**) of these doubles hit New York in a MONTH. I suggest placing a separate bet on the single (the first number on the list); either put more money on it or **play it straight**. Playing the first number **24 ways** for 0.25 cents at 5dimes.com will cost \$12 PER DAY (NY has 2 drawings per day), which will be \$84 SPENT PER WEEK. Give yourself 8 WEEKS to get a STRAIGHT hit; so you must budget **\$672** for this (\$84 X 8). You will win **\$2250** when you get a hit (which is way more than the \$672 investment). **IMPORTANT: You MUST place a blanket bet on these numbers on Saturday night** (play all 7 days in one shot); this is not a situation where you should be playing on a draw to draw basis (I discuss **Blanket Betting** on pages 166 to 178 of **The Coding Report**). You can miss out on a **\$750**, **\$1500** or **\$2250** payday if you **miss a single drawing** or if you “forget” to play your numbers on a particular day; so you have to **automate your game** by putting a blanket bet on the numbers on Saturday night.

The output will look like this:

**New York Super 6**
