I wrote this short report for a very important reason; there are people playing Pick 3 who should NOT be playing Pick 3. They are in desperate need of money to pay the rent, put food on the table, take care of their family, or pay medical bills – but they are depending on a **game of chance** to make this money. Let me tell you something; this is foolish. NEVER depend on a game **ruled by randomness** to make serious money (5K, 10K, 20K, etc.)...especially when you really NEED the money.

You should play Pick 3 because it's a **fascinating** and **challenging** hobby (do it for **FUN!**) - not because you need money to pay your rent in two weeks. (The money is great when you win - but it's just a nice Bonus). If you are in desperate need of money, do something more reliable like getting a **second job** (maybe something part time on the weekend or at night) or **start a business**, or **sell something**, or figure out a way to **turn a talent you have into cash** ("What am I good at? And how can I turn this talent into cold hard cash?"). You can do these and other things to make extra money - but not play a lottery game. And to help you do that, I suggest you read the **Wealth Building** Kindle that I wrote a while back using Mike Strong as a pen name (it's priced at just **\$2.99** on Amazon; no Kindle device needed; it will just download into your computer).

The strategies I teach in this Kindle are based on things that I have done in the past and that **I continue to do to this day.**
