

The Win 4 Codes Must Be Updated Every WEEK!

It is now Friday November 7, 2018 and a suspicion I had for a while has proven itself to be correct.

I originally did not want to put up Win 4 programs because I knew that sooner or later the programs would be useless or of little use because the codes would become outdated. I now see that this is 100% correct. I will now provide proof of this.

Win-4 Programs

- > **NEW YORK 16**
- > ARKANSAS 12
- > CALIFORNIA 12
- > CALIFORNIA 22
- > GEORGIA 77
- > GEORGIA D88
- > MISSOURI 8
- > NEW JERSEY 12
- > NORTH CAROLINA 6
- > OHIO 22
- > SOUTH CAROLINA-31
- > TEXAS-20 Singles
- > TEXAS-27 Doubles
- > VIRGINIA 9
- > WIN 4 CODING PROGRAM

If you look at the New York Win 4 program (or at any of my Win 4 programs)...

Win-4 Programs

> **NEW YORK 16**

> ARKANSAS 12

> CALIFORNIA 12

> CALIFORNIA 22

> GEORGIA 77

..... you can go to the bottom of the program and see what codes the program is based on. For example, you will see this at the bottom of the New York Win 4 program (this program was last updated on November 25, just **12** days ago):

This program is based on these 16 codes:

1146 2249 3577 2669 4456 4667

2374 4689 0246 0679 1578

1144 1166 0099 1114 1116

However, I just updated the codes on my Excel sheet and I am getting a DIFFERENT set of hot codes.

The maximum number of codes that you should use to determine what are the hottest codes **right now** is 60 weeks. New York has 14 codes or numbers per week, so this is equal to 840 codes (14 X 60 weeks = 840 codes). So I copied all the codes on my Excel sheet (I copied row F) and pasted the codes into the **Group Matching System-840** program; this program will only use the first 840 codes on the list and delete the rest.

- > GROUP MATCHING SYSTEM-4
- > SINGLES-DOUBLES (FULL)
- > SINGLES-DOUBLES-TRIPLES
- > **GROUP MATCHING SYSTEM-840**
- > GROUP MATCHING SYSTEM-770
- > GROUP MATCHING SYSTEM-616
- > VISUAL DIGIT DIST-440
- > VISUAL DIGIT DIST-460

Below is the output I just got.

The red codes are obviously the hottest codes in the last 60 weeks in New York. These codes hit a total of **97** times in the last 60 weeks. $7 + 30 + 60 = 97$.

$$7 \times 1 = 7$$

7-Way Match: **2347** (1)

$$6 \times 5 = 30$$

6-Way Match: **0136 0246 0679 1578 4689** (5)

$$5 \times 12 = 60$$

5-Way Match: **0135 0178 0239 0389 0567 0579 1146 1278 1689 2249 3577 4569** (12)

Notice how these codes are different from the ones that the NY program is based on:

This program is based on these 16 codes:

1146 2249 3577 2669 4456 4667

2374 4689 0246 0679 1578

1144 1166 0099 1114 1116

Some of the codes are the same; but overall, the codes are different.

By the way, there are a lot of numbers here, but you can cut down on the list. For example, you can just play the top 6 numbers and the 3 doubles from the 5-way list (**1146, 2249, 3577**). This basically means that you can customize your playlist based on your budget.

7-Way Match: **2347** (1)

6-Way Match: **0136 0246 0679 1578 4689** (5)

5-Way Match: 0135 0178 0239 0389 0567 0579 **1146** 1278
1689 **2249 3577** 4569 (12)

What does all of this mean?

1-It means that the codes have to be updated EVERY Week.

This means adding the NEW codes to the Excel sheet every week and then seeing on Saturday night what are the new set of hot codes. The numbers to be played for the coming week have to be based on this new updated list of hot codes.

2-It also means that you can NOT depend on the Win 4 programs for the BEST numbers to play because the hottest codes change all the time.

So what can we do?

Here is what I will do:

If you are a Gold member, I can send you the list of codes for the states I have up. I will send you the Excel sheet for that state and **it will be up to you** to update the codes every week (add the NEW codes to the Excel sheet at the end of every week on Saturday night). Then you will have to enter the codes of the last 60 weeks into the **Group Matching System** to determine what are the hottest codes.

This is MORE WORK – but it will give you the best codes possible.

Then you will have to enter these hot codes into a formatted Excel sheet to turn the codes into the actual numbers to play for the coming week (I will be sending out a report and Excel sheet explaining how to do this) – **but if you have been paying attention, you should know how to do this already.**

Basically, this means that you can NOT depend on me to update the codes for you every week (there are too many states and I just don't have the time) – **you will really have to learn my coding system so you can accurately update the codes yourself every week and then turn these hot codes into the actual numbers to play for the coming week.**

Therefore, if you are a GOLD member, you can email me and request the Excel sheet for your state. So if you are from Georgia, for example, you can email me with this on the subject line of your email: **GOLD MEMBER-SEND CODES FOR GEORGIA.**

And if you are in New Jersey, you would email me with this on the subject line of your email:
GOLD MEMBER-SEND CODES FOR NEW JERSEY....and so forth.

This is going to mean more work – but this new process will give you the BEST codes and numbers to play for the coming week.

Just to be clear; **using the Win 4 programs (listed below) will NOT give you the best possible Win 4 numbers to play for the coming week.** You will have to update the Win 4 codes for your state EVERY WEEK. Then look at just the last 60 weeks and see what are the hottest codes during this 60 week period. Identify these hot codes and then turn these hot codes into the actual numbers to play for the coming week.
