

# The AE Straight Coding System

I have some exciting announcements.

In a previous email I discussed my Win 4 straight number system. The system works – but it works much better in the Pick 3 game. So what I will do for now is focus on perfecting this system for the Pick 3 game. After some success in the Pick 3 game, I will move on to the Win 4 game.

I also mentioned on my last email that my straight number system will be a pen and paper system. However, I can NOT make this system work without the 40 number distribution. So the 40 number distribution is **mandatory**; it is what makes everything work.

Therefore, I will be putting out a Kindle going into detail on how get this distribution with just pen and paper. If you can get the distribution with just pen and paper, then this can be a 100% Pen and Paper system (no program required). But I have to tell you; it helps if you can do this with a program (mine or someone else's).

The straight number system I came up with (which works for the **Pick 3**, **Pick 4**, and even the **Pick 5** game: 46890) is based on **reducing the game to just 5 “numbers” or sets.**

Right now I am calling this the  
**AE Straight Coding System.**

AE is short for the **ABCDE Coding System.**

Each of these letters represents TWO digits.  
So all 10 digits are covered.

**The beauty of this system is that each formula (for example: ABC) represents just 8 STRAIGHT numbers because  $2 \times 2 \times 2 = 8$ .**

**Normally you have a 1 in 1000 chance of getting a straight hit in the Pick 3 game ( $10 \times 10 \times 10$ ).**

**However, with this coding system you have a 1 in 125 chance of getting a straight hit because this system reduces the game down to 125 formulas ( $5 \times 5 \times 5 = 125$ ).**

I will go into all this in more detail in my next Kindle, but you can get a preview of how this system works by checking out my BRAND NEW programs based on my ABCDE Coding System.

They are on the Gold section of my site:

Right now this program only has two formulas or 16 straight numbers (two formulas =  $8 \times 2 = 16$  numbers).

This new program will have the full list of 160 straight numbers for the New York Pick 3 game in a few days. I will be explaining how to play these numbers soon.

160 straight numbers is a lot of numbers to play.

However, this system comes with a special tracking system that tells you exactly WHEN to play the numbers. This means that **you only play these numbers when you see specific triggers.**

**IMPORTANT: This is a SHORT-TERM playing system.** This means that you play these numbers expecting to get a hit on the very NEXT drawing. You do NOT hold onto these numbers for a week – just for 1, 2, 3 or a maximum of 4 drawings.

My next Kindle will explain this ABCDE Coding System in detail. It should be up on Amazon in about two weeks.

# Simplification 1234

Below I summarize and simplify everything I teach.  
These 4 steps represent the BEST of the best.  
These are my 4 best strategies and products. If you are new to my list or just want a simplified version of everything I teach, these are the only 4 things you should focus on.

## 1-Read the Introduction Kindle.

This Kindle explains the basics of my **7 Day Coding System** and the importance of the digit distribution of the last 40 numbers that hit on Saturday night (my **Lucky 7 System** is a specific application of the 7 Day Coding System). If you email me the code on the last page, I will email you the PDF version of the Kindle which is easier to read and navigate:
