

The DR20 SYSTEM in Georgia

On Monday May 18 I predicted these six hot digits for New York: **257169**. The corresponding playlist (using the Wheeling Program) for these six digits is this:

125 126 127 129 156 157 159 167 169 179
256 257 259 267 269 279 567 569 579 679

10	11	12	13	14	15	16
211	230	975	257	617	725	276
792	723	795	388	948	792	549
17	18	19	20	21	22	23
683	257	755	108			
615	721	972				

The number **972** hit the following day.

257169

125 126 127 129 156 157 159 167 169 179
 256 257 259 267 269 **279** 567 569 579 679

972 Hit the Next Day on Tuesday.

Where did I got those six digits?

What is this system based on?

I used the DR20 SYSTEM program.

I recently moved this program up on the menu.

Now its here:

First, a little background.

I came up with the **Reference Box** several years ago.

You can see my original post on lottery post here:

<https://www.lotterypost.com/thread/227727>

A **Reference** Box maintains the straight format of the numbers.

However, a **REVELATION** box turns straight numbers into box numbers (308 gets turned into 038).

If you want to learn more about the difference between the **Reference** Box and the **Revelation** Box, I suggest you read this Kindle (just \$2.99 on Amazon):

DR20 stands for "Daily Revelation 20." This is a day to day system and it's based on the digits you see on the top two levels of the Revelation 20 program. This program is based on two observations: (1) the digits on the top two levels of the Revelation Box tend to hit (in any order, not just from left to right) and (2) the 20 draw Revelation Box is the best one to use on a day to day basis because it most accurately reflects what is going on right now in the game.

This is what I mean.

If this is the Revelation Box for the last 20 numbers that hit....

2 5 7

1 7 9

3 2 8

4 6 2

5 8 3

...the digits in the top two levels (2 5 7 1 7 9) tend to hit in the next day or two with incredible frequency. These six digits tend to hit in ANY order; that is why it is best to use the Wheeling Program to get the full list of numbers for these FIVE digits. Keep in mind that when a digit repeats (like it does here: 7 repeats) you will get FIVE unique digits, so the playlist will only have 10 box numbers. When there are six different digits, you will have a playlist of 20 box numbers.

This program works with 20 numbers.

The 20 numbers going back from MAY 18 in New York are:

721 257 615 683 549 276 792 725 948 617

388 257 795 975 723 230 792 211 272 919

I have gone back and forth with this program over the years. It seems to work for a time – and then it stops working. I recently figured out why. Notice what I recently added to the bottom of the program:

Periods A-B-C

There is a transition period when this program does **not** work. There are 3 points in time: A, B, and C. During period A a specific set of digits are dominant (say 12578). This program works very well during stage A. However, soon the A digits are replaced by another set of hot or dominant digits during stage **C** (say 03459). The program works during periods **A** and **C** - but not during period B (the time in **B**etween the two periods). After you see one or more hits from the A digits, the program will enter stage B which is when the program does NOT work (the digits on top of the Revelation Box will not hit). Wait for the next set of hot digits to show up in a few days (the C digits; the NEW dominant digits). At that point the digits on top of the Revelation Box will hit again. The C digits will then become the A digits (the dominant digits in the game) and the cycle will repeat again.

However, I now see that this may not be the case with FAST moving states like GEORGIA and TEXAS. Since there are 3 (GA) and 4 (TX) numbers hitting per day, the Revelation Box changes quickly – so the B period (the time **B**etween the two sets of dominant digits) may be shorter. This basically means that this program should work better in GEORGIA and TEXAS than it does in other states (at least theoretically). This is especially true if you give the 10 or 20 numbers TWO days to hit (SIX drawings in Georgia).

For example, below are the 20 numbers for Georgia starting from MAY 14, 2020.

592 576 154 231 057 593 835 288 715 228

**Keep in mind that the REVELATION Box is based on
BOX numbers. So the program will turn all of these
straight numbers into box numbers:**

034 267 788 257 455 268 168 025 079 668
259 567 145 123 057 359 358 288 157 228

Below is the output from the program:
